Instructions for the correct use of INSTRU PLUS

Dear Madam or Sir,

for years our customers used our product INSTRU PLUS for manual cleaning of surgical instruments and medical devices including endoscopes.

Due to the identical product name of a disinfectant of the company Dr. Deppe, a confusion of both products can occur within the manual reprocessing process of medical devices. Because of the risk of confusion, we are taking certain measures to avoid mistakes with processing of medical devices.

From now on, we will therefore provide the product labeling of INSTRU PLUS with an additional note that clearly and visibly indicates the application area of INSTRU PLUS.

Further information concerning INSTRU PLUS and the correct application of the product can be found on our website www.schumacher-online.com.

If you have any further questions, please do not hesitate to contact us directly.

Kind regards
