Dear Valued Integra Customer,

Integra LifeSciences is voluntarily issuing this Field Safety Notice for SurgiMend® PRS, SurgiMend® PRS Meshed, SurgiMend®, SurgiMend® MP, PriMatrix®, PriMatrix® Ag products listed in Appendix 2, distributed from March 1, 2018, to date.

# Reason for Recall:

Based on an internal investigation, Integra LifeSciences has identified issues with in-process and finished goods endotoxin testing that may result in out of specification endotoxin results. Accordingly, we are recalling those products per the instructions below. Our records indicate you have received at least one of those products, including products in consignment.

Fifty-three (53) complaints have been received worldwide for which endotoxin could not completely be eliminated as a possible contributor to patient signs and symptoms (see Risk to Health section below for the harms). These fifty-three (53) complaints were deemed reportable to FDA. Eleven (11) complaints occurred in Europe and were reported to the European National Authorities.

# **Risks to Health**

Per the Health Hazard Evaluation conducted for this issue, the potential harms due to high levels of endotoxins may include low-grade fever, inflammation, and/or inflammatory response leading to fever (pyrexia), and/or surgical intervention/revision surgery. Per the conclusion of this evaluation, there is a remote possibility of these adverse health consequences occurring.

If you have already implanted or used the products affected by this recall, we recommend you monitor the patient for a fever in the immediate postoperative period according to the standard hospital or clinician protocol. If these harms do occur, they would most likely begin to present themselves after the first few days to within a few weeks post-operative care.

The risks have been assessed based on the International Standards for Medical Devices (ISO 14971) and other applicable regulations.

Dear Valued Integra Customer,

Integra LifeSciences is voluntarily issuing this Field Safety Notice for SurgiMend® PRS, SurgiMend® PRS Meshed, SurgiMend®, SurgiMend® MP, PriMatrix®, PriMatrix® Ag products listed in Appendix 2, distributed from March 1, 2018, to date.

# Reason for Recall:

Based on an internal investigation, Integra LifeSciences has identified issues with in-process and finished goods endotoxin testing that may result in out of specification endotoxin results. Accordingly, we are recalling those products per the instructions below. Our records indicate you have received at least one of those products, including products in consignment.

Fifty-three (53) complaints have been received worldwide for which endotoxin could not completely be eliminated as a possible contributor to patient signs and symptoms (see Risk to Health section below for the harms). These fifty-three (53) complaints were deemed reportable to FDA. Eleven (11) complaints occurred in Europe and were reported to the European National Authorities.

Per the Health Hazard Evaluation conducted for this issue, the potential harms due to high levels of endotoxins may include low-grade fever, inflammation, and/or inflammatory response leading to fever (pyrexia), and/or surgical intervention/revision surgery. Per the conclusion of this evaluation, there is a remote possibility of these adverse health consequences occurring.

If you have already implanted or used the products affected by this recall, we recommend you monitor the patient for a fever in the immediate postoperative period according to the standard hospital or clinician protocol. If these harms do occur, they would most likely begin to present themselves after the first few days to within a few weeks post-operative care.

The risks have been assessed based on the International Standards for Medical Devices (ISO 14971) and other applicable regulations.
